

LETTER OF INTENT

On partnership in technology transfer and commercialization of innovative space sector technologies between Kapitech and Data Techno Park

Kapitech Ltd and Data Techno Park Ltd (DTP), both recognize that information and communication technology (ICT) innovations in space sector development in conjunction with the ample knowledge transfer strategies are at the heart of the global economic competitiveness of the European Union (EU) partners.

Both Parties acknowledge that ICT is an important driver to facilitate development of the space technologies, products and services with the aim to support the research and exploration processes through engagement of academia, global industry partners, SME's and public sector.

Both Parties hereby agree to establish a dialogue for technology innovation, scientific cooperation and to build mutually beneficial commercialization strategies; in order to implement this dialogue and in accordance with their respective bylaws, both Parties shall promote and encourage direct cooperation of the respective members of the business and the scientific communities towards sectors of such joint interest as: information and communication technology, medicine, biotechnology, chemistry and renewable energy, agriculture, transport.

In particular, the Parties agree to support the engineering projects specialized in innovation management in the space business and consulting by participating in the projects of the European Commission (EC) and the European Space Agency (ESA) to increase the level of cooperation and technology transfer between business and research institutions.

Cooperation will be pursued with a view to enhance economies of scale in the EU value chains; this dialogue shall consider the development of business strategies, including the technology transfer cooperation, as a catalyst for space sector competitiveness.

Both Parties shall encourage their respective pan-European partners to be actively involved in building strategic business alliances in the space sector.

Both Parties shall support the organization of events, such as conferences, trainings, missions, matchmaking events and others, in order to streamline developments or partnerships between business community and academia as well as members of other sectors leading to the sectorial innovation for joint venture cooperation.

Both Parties shall ensure that suitable organizational arrangements will be put in place for the pursuit of the dialogue; in order to accomplish that objective, the Parties shall establish contact points at technical level..

The dialogue platform to be formed shall be open and flexible so that it can be adapted to the future priorities.

This Letter of Intent does not entail any legally binding effects in respect of either Party.

This Letter was co-signed in the City of Wroclaw on Friday, December 9th, 2016.
